

## Development Strategy as project leader

### 【Develop points】

#### ■ Clean unit performance improvement

Dispel inferior points(劣位点の払拭)

- improved recovery of chemicals ;Development of Multi-cup

Improve drying performance

- Hot IPA drying / dry air atmosphere drying

#### ■ Productivity differentiation through maximization

Strong competitiveness Batch Equivalent Productivity Need.

- 1000wph capable Concept ; 1.7 x the conventional  
20 spin units / transport capacity
- Equipment that does not stop (Even trouble does not stop all equipment)  
Non stop concept
- Fast delivery time possible equipment;  $\triangle 30\%$  compared to conventional equipment  
Module out concept
